

Herculan RH

ROLLER HOCKEY

Herculan RH sports surfaces are eco-friendly, seamless and cushioned multi functional floors with mixed elastic properties. Suitable for all indoor sports, including roller hockey and wheelchair sports and multi functional use.

The **Herculan RH** sports surfaces meet all the latest European Standards for multi purpose indoor sports surfaces, the EN 14904:2006. The **Herculan RH** system is a certified and approved sports floor in the Dutch Olympic Committee's sports flooring list.

Herculan RH sports surfaces are certified by the International Handball Federation [IHF].

The **Herculan RH** system passes the German AgBB/DIBt emission test and is rated as safe for indoor building materials.

The high performance, seamless surface of the **Herculan RH** system is non-porous, therefore hygienic and easy to clean. **Herculan RH** systems provide the optimum slide and slip resistance required in today's most demanding sports. Due to its high mechanical strength and elastic properties of the Herculan EX 800 thickness layer and the excellent wear resistance of its Herculan PU 145 or Herculan PU 100W top-layer, this tough and durable sports surface can also be used for exhibitions, concerts, speech-days and all kinds of other non-sports functions without extra protection.

All Herculan Sports Surfaces are easy to maintain and can be resurfaced quickly and economically when required.
